Emulator Cable suitable for Ford*
ADC2020 - Code D756922AD

May 2024

Enables faster programming of replacement Ford proximity and bladed keys even when the alarm is active and no working key is available.

What does the ADC2020 emulator cable do?

The emulator works together with the Smart Pro and Advanced Diagnostics ADS2269 software to create a master key in all keys lost situations for a wide range of Ford models.

Key data is read from the vehicle using the Smart Pro software and then written to the emulator which is connected directly to the Smart Pro via a USB cable. The emulator then becomes the master key for the vehicle allowing additional keys to be programmed in a faster, smoother process.

Why do I need the ADC2020?

· Faster procedure. Eliminates time wait after reading data.
· Shuts down active alarm.
· No need to cover ultrasonic sensors to silence alarm.

What else is needed?

Smart Pro

ADS2269 Programming Software
