## NAPCO StarLink Intrusion MAX2 Multi-Carrier 5G Communicators

The StarLink Intrusion MAX2 is the ideal solution for alarm signal communications, offering unmatched reliability and versatility.

Designed to work universally with any brand of security system, it's the ideal choice for both new installations and POTS line replacements, ensuring secure, continuous alarm reporting and streamlined system upgrades.

Equipped with advanced Multi-Band technology, the MAX2 delivers broad and dependable coverage by connecting across Verizon, AT&T, and T-Mobile networks.

Its smart signal-selection feature automatically identifies and locks onto the strongest available carrier, and seamlessly switches in the event of service disruption, keeping your system connected when it matters most.

Engineered for professional performance and affordability, the MAX2 offers the lowest equipment cost, the lowest monthly service rates, and an instant Pro Rebate (#SLE-MAX2L) to maximize your savings and ROI.

Whether you are protecting residential or commercial properties, the StarLink Intrusion MAX2 delivers the powerful, future-ready connectivity you need – all in one compact, plug-and-play communicator. Upgrade your intrusion systems with confidence – choose StarLink MAX2 for universal compatibility, multi-carrier resilience, and unbeatable value.

## Traffic Control Wedge Barrier System from DoorKing

DoorKing's Model 1625 shallow/surface mount Vehicular Wedge Barrier product is ideal for applications that require a high degree of vehicular control and perimeter security.

The heavy-duty reinforced steel wedge and buttresses are engineered to deliver debilitating damage to passenger vehicles and light-duty trucks attempting to breach a controlled perimeter traffic lane. The wedge is counter-balanced and mechanically linked to an electric operator, eliminating the need for hydraulics to raise and lower it in place.

The shallow-mount wedge requires a concrete pad only six (6) inches deep and is crash rated to the ASTM 2656-23 standard: PU-30 (P1, P2). The wedge can also be surface-mounted, making it ideal for any property from multi-level parking structures to slab lots and is available in widths from 12 to 18 feet.

The Wedge Barrier is ideal in applications where a higher degree of vehicle traffic control is desired, but without the expense of bollards, wedges or crash beams – making it ideal for apartment communities, gated condominiums, car rental agencies, parking lots and toll booths.

## Salto XS4 Com Smart Door Intercom

The Salto XS4 Com is an innovative cloud-based door intercom solution that transforms building access and communication by integrating video intercom capabilities with advanced access control technology. This hardware-free solution leverages the user's own smartphone in combination with QR code and NFC technology to provide secure, convenient visitor access without complex installations or wiring.

Key features include:

- Hassle-free installation and minimal setup and no complex wiring
- Real-time video and audio communication between visitors and tenants or building staff
- Remote door unlocking capabilities from anywhere via smartphone
- Seamless integration with Salto's access control platforms (Space, KS and Homelok)
- Geofencing technology for enhanced security

The XS4 Com iGO product line includes polycarbonate plates and stickers with QR code and NFC functionality. The system allows visitors to simply scan a QR code or tap their phone on the NFC plate to initiate an access request call, then tenants can verify visitors via secure video calls and grant access remotely through the XS4 Com app.

Designed for versatility, XS4 Com is suitable for commercial buildings, multi-family, healthcare facilities, educational institutions, hospitality venues, and workspaces, enhancing security and streamlining access management across various environments.

## NAPCO's MVP EZ App: The Phone Does it All

The MVP EZ App is the ultimate mobile tool for access control professionals, putting powerful system management right on a smartphone.

Designed to streamline setup and everyday operation, this intuitive app allows you to configure, command, and control Napco Access systems – anytime, anywhere.

Fully compatible with Napco Access's Network, Trilogy, and ArchiTech locks, including smart deadbolts and gateways, the MVP EZ App makes managing access points easier than ever. From enrollment to remote locking/unlocking and user updates, everything is handled in-app with no PC or onsite visit required.

Built as a secure cloud-based service, MVP EZ is ideal for small to medium-sized businesses (SMBs), supporting installations from just a few doors to up to 50, perfect for office suites, retail locations, schools, or multi-tenant buildings.

Beyond its robust core functionality, the MVP EZ App opens the door to new revenue opportunities, enabling dealers to perform remote customer services, such as access rights changes, credential management, and system diagnostics, without rolling a truck.

Empower your business with next-level convenience, efficiency, and customer satisfaction – get more done, faster, with the MVP EZ App.

## Complete Access Control Component Solutions from SDC

SDC's access control security solutions can be found in any application where code-compliant access control of a door is required including: industrial, commercial, retail, healthcare facilities, technology centers, high-rise buildings, nuclear power plants, laboratories, museums, art galleries, libraries, schools and universities, airports and transportation facilities, government centers and military bases across the globe.

Whether it's for a single, standalone door application, or for a PC-managed, multi-door project, SDC's line of complete mechanical and electronic component solutions are easily configured to meet specific access & egress control needs.

SDC transforms the application of electricity to door openings for security, fire & life safety and/or ADA requirements.

With a robust toolbox of over 35,000 access & egress control components at our fingertips, SDC has assembled turnkey solutions to address both market-specific and application-specific requirements for almost any door opening imagined. Code compliance, convenience, safety and security are built into our products for facility and asset protection, and to create a safe environment for employees and visitors.

## Camden 1/2-Inch Surface Mount Rim Strike With Preload

Camden Door Controls has introduced the industry's first 1/2-inch RIM Strike with 15 lbs. preload. Camden 1299 Series strikes are Grade 1 rated, include latch monitoring at no extra cost, and are UL 1034/294 listed. Available in brushed stainless steel or black finish, 1299 Series 1/2-inch preload RIM strikes offer 'Universal' performance with selectable 12/24V, AC/DC voltage, and fail-secure/fail-safe operation. The strikes are packaged with 1/8-inch and 1/4-inch spacer plates at no extra cost to provide compatibility with virtually any RIM exit device. A metal marking jig is also included in the packaging, making installation fast and easy. Like all Camden strikes, it is backed by Camden's exclusive five-year no-hassle product warranty.

## Custom Profile Cylinders from FPL Door Locks & Hardware

FPL custom profile cylinders are configured in the U.S. to your exact specifications, engineered for precision. They can be made in any offset size, down to the exact millimeter. Even cylinders over 8 inches long are no problem (even higher than 100mm on each side of the cam). Choose from Single, Double Keyed, Privacy, or Half Cylinders. FPL

profile cylinders are available with Schlage or Yale keyway, with 360-degree full rotation or 90-degree quarter rotation. Some sizes also available with 8-pin or 16-pin security options.

## Medeco eCLIQ from ASSA ABLOY

Medeco eCLIQ is an electronic locking system that provides electronic access control without wiring, and retrofits into existing doors and locks. It is a cost-effective solution that offers strong security and AES encryption. Robust scheduling, auditing, and management of access rights are available through local, self-hosted, or web-hosted software. It can be used indoors or outdoors, and for systems of any size. Its revolutionary keys are powered by a lithium coin battery. The user key comes with a 10-year battery life. The eCLIQ Connect Key, which is powered by Bluetooth Low Energy (BLE), communicates with a smartphone or tablet for authorization changes.

## INTERNET OR CELLULAR SYSTEMS

DKS Telephone Access Systems can be connected with an internet or cellular connection. Both include the DKS Cloud that allows administrators to program the system from any internet connected device; laptop, tablet or smartphone! Team this with DKS' 900 MHz wireless access expansion to control access for up to 24 entry points.

## PROXPLUS™ SECURE CARD READERS

For those applications that require a higher level of security than standard Proximity Card Readers and cards can offer. ProxPlus cards are programmed with a unique identifier, making them extremely secure and difficult to duplicate. And, since the DoorKing Card Reader outputs the card code in a 26-bit Wiegand format, they are compatible with almost any Access Control System on the market.

## TRAFFIC CONTROL

The DKS 1625 Wedge Barrier is designed to be used with the 1602-590 operator (sold separately). The Wedge Barrier is ideal in applications where a higher degree of vehicle traffic control is desired, but without the expense of bollards, wedges, or crash beams – making it ideal for apartment communities, gated condominiums, car rental agencies, parking lots, and toll booths.

## DC OPERATORS

When it comes to securing a high traffic gate in any location, or with unreliable power, DKS manufactures a full-size DC Gate Operator. With the ability to switch from AC to DC seamlessly and pull a full-size gate for hundreds of cycles from backup batteries, DC also means the operator can be completely off the grid with a solar power supply.

## Arrow Indicator Locks, Available at Banner Solutions

Offer your customers the ultimate solution in reliable security and control.

Arrow Grade 2 Indicator Locks are engineered for demanding environments, providing uncompromising security and precise control. Their intuitive design ensures easy operation and enhances safety. ## Schlage Latch Retraction Mortise Solutions

Six L Series mortise functions featuring ultra-quiet, motor-driven latch retraction are now available from Schlage. Quick activation can be used for momentary or continuous operation. A unique, patent-pending feature detects binding conditions on the latch motor and adjusts as needed to overcome side load, static pressure and warped door conditions.

Compatible with access control and fire systems, functions include passage, store-room, institutional and three electrified lever control options. Lever control functions feature a second motor enabling latch retraction and lever control to be managed independently. All functions can be ordered with latchbolt monitoring and all but institutional are also available with request-to-exit. They are offered in all the finishes and lever designs of L Series mortise and retrofit into the same door pocket.

These fire-rated solutions can provide a more elegant and quieter option for doors that commonly employ electric strikes such as areas requiring limited or timed access such as service/utility closets, employee entrances, or training areas.

In K-12, they serve visitor vestibules and administrative office entries, as well as classroom doors with centralized lockdown. Paired with an auto operator, they offer a perfect solution for accessible restrooms, hands-free and many other types of entries.

## CP-LUBE Dry Film Lubricant from Sandstrom Products

CP-LUBE (PoxyLube CP-200) is Sandstrom's proprietary formula dry film lubricant. One spray powers out old gunk, dust and dirt that corrodes moving parts and leaves you with 'frozen' locks. Graphite's acidity in dry environments corrodes metal, and traditional spray lubricants worsen problems by attracting dirt that ruins locks over time, but CP-LUBE cleans out the damaging gunk caused by other products, then lubricates and protects for long-term smooth functioning. Trusted by the aerospace industry, schools, apartment complexes, prisons, and professional locksmiths nationwide. CP-LUBE's hard-wearing dry film coating clings to all metallic and nonmetallic surfaces and is unaffected by water or normal temperature fluctuations. Ideal for use on moving, sliding or connecting parts in industrial or home applications.

<https://sandstromproducts.com/products/dry-film-lubricants>

## Bruken Digital Glass Door Lock from ASSA ABLOY Glass Solutions

Provide keyless access control to all-glass interior openings with the Bruken DL-GS3550 Digital Lock from ASSA ABLOY Glass Solutions. This field reversible device is ideal for retrofit applications and features three modes of access, including fingerprint identification, numeric passcode, and smart card. This multi-user lock requires no glass fabrication for easy installation and is compatible with single or pairs of glass doors that are 3/8 to 1/2-inch thick. Its sleek interface provides visible operation status and shows battery voltage in real time, warning the user when power is low to avoid lockout situations. In addition, this cutting-edge product features multiple language options, a volume adjustment function, the ability to view a detailed record of usage, and more.

# WIRELESS POWER TRANSFER FOR ACCESS CONTROL

Add Electrified Locksets  
Without Door Core Drilling

## Send Power & Data Across the Door Gap

SDC's WPT's RF technology sends power wirelessly across the door gap and allows for transfer of latchbolt monitoring, REX or data signals. **WPT is perfect for powering, monitoring, controlling or communicating**

**with failsecure electrified cylindrical locksets** like our Electra™ 7200 series solenoid controlled cylindrical locks. These code compliant electric cylindrical locksets stay latched even when unlocked, maintaining code compliance.

### WPT SERIES

Wireless Power Transfer Devices

- No door core drilling
- RF transmits energy to be converted to DC voltage
- Transfers data signals

### 7200 SERIES

Solenoid Controlled Cylindrical Locks

- Heavy duty cylindrical design
- New or retrofit construction
- Vandal resistant clutch
- Field selectable dual voltage

### 632 SERIES

2-Amp Power Controllers

- Regulated and filtered
- Linear DC power, class 2 output
- Fire/emergency release inputs
- Isolated battery charging circuit

within seconds. The technology detects and extracts people's faces in live video streams or video footage, stores video snippets for each appearance, and constantly compares them to each other and to images in databases. In addition, the software uses anonymous facial analysis to count individuals, generate demographic information,

track people movement in time and space, detect frequent visitors and crowds, and much more. It works with a number of industry-leading HD video cameras, and includes the REST API for easy integration into other video technologies.

## iFace Max Facial Recognition from Control iD

With a modern design and elegant finish, iFace Max by Control iD is the ideal device for monitoring and controlling the entry and exit of people through facial identification technology. Its advanced algorithm and high-quality cameras allow the identification of up to 100,000 faces (1:N) with face liveness detection and identification of users with and without a mask. iFace Max has an integrated SIP intercom with TCP/IP, USB, and PoE connectivity. The device also features a large 7-inch LCD touchscreen display that allows easy and intuitive navigation for configuring access rules and viewing reports.

## New Easy Cloud-Hosted Option

# Now the Sky's the Limit for New Profits From Top-Rated Trilogy Access Locks

- **More Options: New Trilogy Touch** Touchsense Touchscreen Option for Trilogy & Trilogy Networkx & Architech cylindrical, mortise and narrow-stile locks for every door and application
- **More Savings:** Award-Winning Low-Maintenance & Low Operational Expenses, eliminate door-to-door queries and programming updates
- **More Network Management Options:** Easy Security User-, Schedule- and Database-Management plus Real-Time Alerts & Lockdown on a Variety of platforms, including Continental CA4K, EAccess, Lenel OnGuard 8.0/8.1, AirAccess & New Cloud-Based MVP Access.

- **New MVP Access Cloud-Hosted Platform for All Trilogy Networkx Locks & Panels-** Up & Running in a Few Quick EZ Steps; No on-premises PC or database required. Manage Alarm Lock's full line & more in real-time. Easy to afford & quote with flat rate per-door service, super scalable. Features MVP App with full admin controls, lockdown, unlock plus emergency notifications & mobile/NFC-wallet credentials for users.

**MORE AFFORDABLE**  
Lowest labor & equipment costs without sacrificing top conventional access features

**EASY INSTALL**  
Replaces any door lock, on any door type, neatly, quickly

**EASY NETWORK**  
No wires to run to doors. Uses customers' existing network or Ethernet & multi-lock (63 locks/gateway) gateways & optional repeaters

**NEW CLOUD MANAGEMENT**  
For Full Remote-Hosted Services in Real Time w/ Low Flat Rate Per Door

**CENTRALLY MANAGED**  
Auto-Schedule program updates, queries, or free access by time, by door & more

**GLOBAL LOCKDOWN**  
or unlock in seconds from the server or any lock

**USERS**  
Supports thousands of PIN, ID or App users with mobile credentials. Easily local/remotely

## Salto XS4 Com Smart Door Intercom

The Salto XS4 Com is an innovative cloud-based door intercom solution that transforms building access and communication by integrating video intercom capabilities with advanced access control technology. This hardware-free solution leverages the user's own smartphone in combination with QR code and NFC technology to provide secure, convenient visitor access without complex installations or wiring.

Key features include:

- Hassle-free installation and minimal setup and no complex wiring
- Real-time video and audio communication between visitors and tenants or building staff
- Remote door unlocking capabilities from anywhere via smartphone
- Seamless integration with Salto's access control platforms (Space, KS and Homelok)
- Geofencing technology for enhanced security

The XS4 Com iGO product line includes polycarbonate plates and stickers with QR code and NFC functionality. The system allows visitors to simply scan a QR code or tap their phone on the NFC plate to initiate an access request call, then tenants can verify visitors via secure video calls and grant access remotely through the XS4 Com app.

Designed for versatility, XS4 Com is suitable for commercial buildings, multi-family, healthcare facilities, educational institutions, hospitality venues, and workspaces, enhancing security and streamlining access management across various environments.

## Viking Electronics X-205 Series Compact IP Video Intercoms

Viking's compact and sleek X-205 intercoms are a feature-rich solution that delivers HD video and voice communication via SIP VoIP phone systems, cloud providers, or third-party apps. The built-in IP video camera supports both H.264 and MJPEG video compression via RTSP, offering low-light sensitivity, a wide viewing angle, and the capability to output both call and NVR video streams simultaneously at up to 1080p resolution. The X-205 intercoms dial a programmed phone number and automatically cycle through backup phone numbers on busy or no answer. Remote configuration via a user-friendly built-in Web UI eliminates the need for a dedicated app. The intercoms feature an attractive compact surface mount chassis that is available in three different finishes: brushed stainless steel, oil-rubbed bronze, or textured black.

## DoorBird D31TDV IP Door Intercom System

The DoorBird D31TDV IP video intercom is designed for multi-tenant residences and buildings with up to 1,000 units, featuring a flexible mounting system with surface-mount and flush-mount options. The unique design includes a 7-inch touch display module, incorporating advanced security features, including RFID, Bluetooth, and QR code reader. The intercom boasts a Sony Starvis image sensor with Full HD resolution and a 4D motion sensor for enhanced security. With remote configurability via the app, web browser, and a well-documented API interface, this intercom provides seamless integration and customization options.

## Zenitel ZDD-1 Display Door Intercom

The Zenitel Display Door intercom (ZDD-1) features a speaker and microphone array to deliver an immersive sound experience, while high sound pressure levels make it ideal even for high-noise environments. The bi-directional video communication enables face-to-face interaction, fostering a sense of connection, while also supporting the needs of sign language users. The Zenitel Display Door (ZDD-1) features an intuitive touch display with an easy-to-use UI/UX, making navigation

simple and efficient for all users – ideal for mixed-use building communications.

## Loading Dock and Vehicle Access System from Building Intelligence

SV3 from Building Intelligence securely streamlines vendor and vehicle access, delivering security at loading docks, facility entrances, delivery areas, and more. The fully digital and automated system ensures that every person and asset entering a facility is verified, authorized, and accounted for, including third-party vendors, contractors, and delivery vehicles. With SV3, facilities can move beyond outdated, manual vehicle tracking to a fully digital, automated, and scalable security solution that reduces risk while improving operational flow.

## Boon Edam Speedlane Compact Optical Turnstile Platform

Boon Edam's Speedlane Compact modular platform is designed for its Lifeline Speed-

lane Compact Optical Turnstile. It enables use in facilities where trenching or drilling into floors is restricted. Its free-standing, modular design offers an ADA-compliant foundation that ensures accessibility in high-traffic environments without compromising structural integrity. The platform supports a weight capacity of 500 lbs per square foot for high stability and features integrated conduits to accommodate streamlined power and low-voltage wiring. Custom finishes, such as anti-slip coatings and stainless-steel tread plates, are also available to align with various aesthetic and functional needs.

## NAPCO StarLink Intrusion MAX2 Multi-Carrier 5G Communicators

The StarLink Intrusion MAX2 is the ideal solution for alarm signal communications, offering unmatched reliability and versatility.

Designed to work universally with any brand of security system, it is the ideal choice for both new installations and POTS line replacements, ensuring secure, continuous alarm reporting and streamlined system upgrades. Equipped with advanced Multi-Band technology, the MAX2 delivers broad and dependable coverage by connecting across Verizon, AT&T, and T-Mobile networks.

Its smart signal-selection feature automatically identifies and locks onto the strongest available carrier, and seamlessly switches in the event of service disruption, keeping your system connected when it matters most.

Engineered for professional performance and affordability, the MAX2 offers the lowest equipment cost, the lowest monthly service rates, and an instant Pro Rebate (#SLE-MAX2L) to maximize your savings and ROI.

Whether you're protecting residential or commercial properties, the StarLink Intrusion MAX2 delivers the powerful, future-ready connectivity you need – all in one compact, plug-and-play communicator. Upgrade your intrusion systems with confidence – choose StarLink MAX2 for universal compatibility, multi-carrier resilience, and unbeatable value.

## E27 Alarm Engine from ELK Products

The E27 Alarm Engine from ELK is a security control platform that provides integration with leading smart home and automation ecosystems. It supports an extensive range of integrations, including Control4, Alfred, Ecolink, and more. The hybrid wired and wireless security control panel features onboard Ethernet and Wi-Fi. Its hybrid architecture allows for easy expansion with both hard-wired and wireless sensors, making it an ideal choice for

upgrading legacy systems while taking advantage of the latest security and automation features. The E27 Alarm Engine is managed through ElkConnect, a web-based configuration tool that simplifies system setup and management, allowing installers to quickly configure and customize security settings.

## Bosch Building Technologies AVENAR IO Module 4000 Series

Bosch Building Technologies has launched the AVENAR IO (input/output) Module 4000 series, a range of interface modules designed to elevate the efficiency and adaptability of fire safety systems. Interface modules are important parts that connect fire alarm systems to various building applications, like fire dampers, signaling devices, and fire doors. This integration helps ensure a quick and effective response during

fire emergencies. Additionally, interface modules offer diagnostic features, enabling safety managers to monitor and evaluate how well the system is working throughout the entire building. The first module in the AVENAR IO 4000 series is the FLM-430-I2M1.

## Johnson Controls Autocall 4017ES Fire Alarm Control Unit

The Autocall 4017ES Fire Alarm Control Unit from Johnson Controls is available in addressable and conventional versions with three communication options – fire, alarm, and non-alarm – for added clarity during emergency situations and public addresses in small to mid-size buildings. With alarm and non-alarm communication in one integrated solution, landlords, business owners, and property managers can now easily and more efficiently send targeted messaging to individual zones or specific devices within a building, maximizing clarity and improving response times. Additionally, the system supports specific addressable speakers and speaker-strobes as well as multi-tone appliances to deliver low-frequency 520 Hz alarms.

## Resideo First Alert Vista H3 Hybrid Panel

Resideo's First Alert VISTA H3 is the next-generation of its legacy hybrid panel for residential and SMB end-users. It supports multiple wireless technologies and is built for future expansion, integration, and easy cellular upgrades. Featuring a modular design, it is easier to program and manage than legacy VISTA, decreasing installation time and adding remote maintenance and diagnostics. Built alongside the ProSeries AIO, it uses the AN360 installation tool, PROSIX sensors, AES-128 encryption, the TC2 interface, and supports over-the-air updates for seamless user experience. It is optimized for cost-effective inventory management and system takeovers.

## DMP XT75 Control Panel

Digital Monitoring Products (DMP) announces the release of the XT75 control panel – designed to bridge the gap between its XT Series and

the XR Series. The XT75 tightly integrates intrusion, access control, and AlarmVision, making it ideal for customers who need a robust system with a smaller footprint. By combining the XT75 with an XV Gateway, small businesses and residential customers can benefit from AlarmVision technology without upgrading to the XR Series. The XT75 can be programmed with up to 142 zones, 200 users, and 50 wireless fobs. It has a built-in wireless receiver, an onboard network, and connection for a Wi-Fi module.

## Traffic Control Wedge Barrier System from DoorKing

DoorKing's Model 1625 shallow/surface mount Vehicular Wedge Barrier product is ideal for applications that require a high degree of vehicular control and perimeter security. The heavy-duty reinforced steel wedge and buttresses are engineered to deliver debilitating damage to passenger vehicles

and light-duty trucks attempting to breach a controlled perimeter traffic lane. The wedge is counter-balanced and mechanically linked to an electric operator, eliminating the need for hydraulics to raise and lower it in place.

The shallow mount wedge requires a concrete pad only six (6) inches deep and is crash rated to the ASTM 2656-23 standard: PU-30 (P1, P2). The wedge can also be surface mounted, making it ideal for any property from multi-level parking structures to slab lots and is available in widths from 12 to 18 feet.

The Wedge Barrier is ideal in applications where a higher degree of vehicle traffic control is desired, but without the expense of bollards, wedges or crash beams – making it ideal for apartment communities, gated condominiums, car rental agencies, parking lots and toll booths.

## Electric Guard Dog 30 Series Fence from AMAROK

AMAROK's Electric Guard Dog 30 Series Fence is a powerful and intimidating barrier that stops crime

before it happens. Standing 10-feet tall with 30 electrical wires and 7,000 volts of pulsed electricity, the full-perimeter, solar-powered electric fence delivers peace of mind to users and a rude awakening to would-be thieves. Deter criminals and protect assets with three powerful layers of defense in one – an intimidating barrier, a medically-safe, but memorable shocking deterrent, and alarms and lights. These solutions have been proven to prevent 99% of external theft for customers.

## POWER SUPPLIES

### Altronix EBC48 Rapid Battery Charger

The Altronix EBC48 is a high-performance rapid battery charger designed to keep a system up and running – recharging 32AH+ sealed lead acid or gel batteries in less than eight hours. When integrated with Altronix NetWay Spectrum Hardened PoE Solutions, it ensures IP security and surveillance devices remain operational. EBC48 delivers reliability when power is out at the pole, ensuring security and lighting are powered 24/7. Plus, its built-in supervision features monitor AC failure and battery health, providing ultimate peace of mind. The unit is compact, powerful, and essential for uninterrupted performance.

### Inscape Data Integrated Outdoor UPS/PoE Switch

Inscape Data's LPS-UPS1048-400-06P Outdoor UPS PoE Switch System combines a 48V UPS battery backup with an industrial-grade PoE switch, featuring four Gigabit Hi-Power PoE ports and two SFP fiber uplink ports for reliable power and connectivity in outdoor environments. It includes a battery backup unit, a thermostat-controlled fan kit, and a LinkPower Industrial PoE Switch, all housed in a rugged, IP68-rated polycarbonate enclosure for weather protection. It also features an intelligent 48V UPS battery backup system with a 260W power capacity, ensuring continuous 48V DC output for IEEE 802.3af/at/bt PoE devices. This backup power keeps critical equipment, such as IP security cameras, operational during outages.

### LifeSafety Power FPO Series Power Supplies

Engineered for flexibility and scalability, the LifeSafety Power FPO Series power supplies can be configured with other LifeSafety Power FlexPower modules to customize the solution to meet diverse system needs. The FPO Series supports up to 250 watts of DC power with a field-selectable voltage output that is indicated by a color LED: Green for 12V, Blue for 24V. When paired with LifeSafety Power Net-Link® technology, these network-managed power products leverage remote monitoring, system control and proactive alerts to ensure system uptime and long-term performance. The FPO Series empowers security professionals with unparalleled control and insight that allows them to drive action to prevent critical situations, rather than react during them.

## Hanwha Vision 4-channel AI Multi-Sensor Camera

Hanwha Vision has collaborated with NVIDIA to design its four-channel AI Multi-Sensor Camera (model

PNM-C32084RQZ-8XE4T-W) with WAVE VMS, powered by the NVIDIA Jetson Platform. The camera provides Hanwha's AI multi-sensor devices with up to an additional 100 Tera Operations Per Second (TOPS), plus immediate access to the NVIDIA AI app ecosystem. Customers can use this processing power to leverage existing and custom developed applications for the NVIDIA chipset, seamlessly enabling new analytics and capabilities unavailable on competitive cameras. This significantly increases the capabilities of security operations through enhanced intelligent camera functionality.

## Pelco Elevate from Motorola Solutions

Pelco Elevate direct camera-to-cloud technology offers enhanced detection features and streamlined camera maintenance to boost performance and efficiency. Features such as Image Health proactively identify potential camera issues before they impact operations, reducing downtime and maintenance costs. The centralized camera maintenance dashboard simplifies management tasks, allowing for proactive upkeep of an entire camera network. With an additional subscription, organizations can enhance safety and security with the inclusion of PPE detection that actively monitors worker safety, ensuring compliance and preventing potential accidents; and Visible Firearm Detection (VFD) to instantly detect potential threats as they emerge.

## Teledyne FLIR FH-Series R PTZ

The FLIR FH-Series R PTZ is a ruggedized, fixed Pan-Tilt Zoom IP visible plus thermal radiometric camera for fire detection and security applications. The multi-spectral camera integrates thermal imaging with 1080p visible imaging to provide rapid visual verification of smoke and hot spots and for detecting fires early in outdoor areas. The

onboard radiometry in the camera, combined with PTZ functionality, enables continuous wide area coverage and monitoring. When a hot spot or surface temperature change is detected, the contactless temperature measurement is sent to the operator through a connected VMS for assessment and response.

## P3747-PLVE Panoramic Camera from Axis Communications

The AXIS P3747-PLVE Panoramic Camera delivers advanced outdoor surveillance with PTRZ functionality for easy installation and remote adjustments, reducing installation time, disruption, and costs. The camera monitors four areas simultaneously at 5 MP each, delivering sharp, detailed images in any lighting. Featuring 360° IR illumination, Forensic WDR, and AI-powered analytics, it enables real-time detection, tracking, and forensic searches. With Axis Edge Vault cybersecurity and FIPS 140-2 Level 2 certification, the camera combines performance with robust data protection. It is ideal for expansive area coverage.

## i-PRO U-Series Edge AI Cameras

The i-PRO U-series provides AI-based object detection at an entry level. The models are particularly suited for detecting intruders, loitering, direction, line crossing, and speeding, providing an efficient, edge-computing approach. The new product line introduces higher-resolution imaging options, including 2MP, 5MP, and 4K dome, box, and bullet cameras. They include audio recording capabilities for enhanced situational awareness and increased optical zoom. The U-series is designed to be a companion for direct-to-cloud VSaaS deployments, offering flexibility and scalability. As cloud-based solutions continue to evolve, future firmware updates will enable additional features and functionality.

## WD Purple Pro Smart Video Hard Drive from Western Digital

WD Purple Pro high-capacity hard drives deliver reliability and performance for demanding video recording and analytics environments. With capacities up to 26 TB for larger-scale deployments and longer-term video retention requirements, they can record up to 2.5 million hours MTBF. They help users keep up with heavy video data capture and AI analysis found in advanced video management systems, and its AllFrame AI technology intelligently guides video, picture, and metadata streams to disk while helping to reduce dropped video frames.

## Vivotek 5MP Outdoor Turret Domes

Vivotek's has launched two new 5MP Outdoor Turret Dome AI cameras featuring WDR Pro and AI-powered Smart Motion Detection (models IT9383-HV and IT9383-HVW). The cameras offer built-in IR and warm light (up to 30M), cyber protection via Trend Micro IoT Security, and Vivotek's Deep Search Support. They ensure balanced exposure between dark and bright regions, delivering evenly-lit, well-exposed footage with balanced contrast. Customers can also enhance investigative efficiency with data identifying people and vehicles by distinctive attributes such as color, gender, and type.

## Symmetry CompleteView 7.5 VMS from AMAG Technology

Symmetry CompleteView Video Management 7.5 from AMAG features the integration of Vaidio AI Video Analytics, providing a comprehensive suite of advanced analytics for people, vehicles, facial recognition, and objects, compatible with any camera or video source. This enhanced solution supports both real-time monitoring and forensic investigations. Security operators benefit from immediate alerts and notifications, and investigators gain enhanced search capabilities, allowing them to review analytic alarm events. The VMS 7.5 also introduces federation, storage encryption, and export encryption. Federation enables a seamless user experience across multiple sites while eliminating a single point of failure, making it ideal for large, geographically distributed deployments.
