

Medical Laboratory Observer is written for key laboratory management professionals and staff in hospital laboratories, independent clinical laboratories, integrated delivery networks, blood banks, physician office labs, government labs, and emergency care centers.

**Please send queries and abstracts to
Christina Wichmann, Senior Editor
cwichmann@mlo-online.com**

WHAT WE ARE LOOKING FOR

Exclusive, informative, nonpromotional, original content. All MLO feature articles are peer reviewed.

SUBMITTING AN ARTICLE

- ▶ The primary audience is clinical laboratory directors or decision-makers at various levels, mostly with hospital-affiliated labs. The writer can assume our readers have some knowledge of the topic, but not as much as they might wish to or need to have, including the latest knowledge. Try to avoid “medicalese” without oversimplifying the article.
- ▶ The purpose of the article should be made clear in the introduction. Please give the manuscript a title and include subheads as appropriate. Judicious use of headings will help clarify transitions from one topic to another, thus, avoiding confusion for the reader.
- ▶ Articles must be original and not under consideration by any other publication.
- ▶ Care should be taken to avoid errors of fact or ambiguous statements. If procedures or test methods are referred to, make certain they are referenced or described in enough detail to enable readers to duplicate them in their own labs.
- ▶ The manuscript should be sent as Word document (as opposed to a PDF, etc.)
- ▶ Please provide the author’s name exactly as it will appear, including academic degrees as appropriate. Also, please include a two-or-three sentence biographical blurb. These take the form of “Author’s Name, serves as Job Title, Name of Company, provider of Product A and Product B.” Unless the author prefers not to be pictured in the magazine, we use the author’s head shot adjacent to the article. Please provide at

least one 300 dpi. high resolution photo.

- ▶ Send any figures or any graphics as high-resolution attachments, rather than “embedded” in the document. Figures or tables should be referred to by number in the text so we know where to place them in the layout.
- ▶ References should appear as a numbered list at the end of the manuscript, corresponding to superscript numerals given in ascending order in the text of the manuscript. AMA style should be observed. If a reference appears a second time, it should not have a new numeral, but rather the one it has already been assigned. Thus, it is possible that references 1 through 8 may appear, and then reference 4 again, and then reference 9 and so on. Please do not give URLs only as a reference; the author (if there is one) and title of the page should be given, AMA style. Note also, our style is for there to be three, not one, names before the “et al” when there are seven or more authors, as is often the case in medical papers.
- ▶ Tables should stand as independent units, provide adequate identification of heads and subheads, and should be organized in some logical way (i.e., by chronological order or in decreasing order of frequency). The form and arrangement of table elements should make the table easy to understand. When appropriate, please also cite the source for any tables and indicate whether it was copied verbatim, or “adapted” in some way for the article. Please do not “desktop publish” tables into the Word document of the manuscript; rather, send them to the editor as individual jpeg attachments. Do place a parenthetical reference to them in the copy so we know where they should go — e.g. (Table 1).
- ▶ Authors may submit computer-generated charts or graphs, but should also submit all data points used to create the charts so that MLO’s art department can accurately recreate them for publication. Neat, hand-drawn diagrams are also acceptable. Since MLO often illustrates articles for aesthetic, as well as communicative reasons, any ideas for accompanying artwork are also welcome from authors. Look at past issues of MLO and published CE articles for ideas. Ideas for artwork to accompany an article other than a chart, graph, or table should be submitted in a cover

letter. Hand-drawn sketches of ideas are acceptable, too, but they should include a brief explanation of the subject matter. Please do not “desktop publish” figures into the Word document of the manuscript; rather, send them to the editor as individual jpeg attachments. They must be high resolution, not from a website. DO place a parenthetical reference to them in the copy, so we know where they should go-e.g. (Figure 1).

- ▶ Avoid auto-formatting of endnotes, bulleted or numbered lists. There is no need for headers or footers or any elements of “desktop publishing.” In particular, please turn off the “virtual footnotes” function in your software that puts footnotes as the bottom of each page.
- ▶ Articles are peer reviewed. Prior to final acceptance, two to four peer referees, as well as our editors, review the manuscript. In most cases, authors will be asked to make revisions based on the feedback from reviewers. Authors are sent a copy of the edited manuscript to review prior to publication.
- ▶ Manuscripts are subject to editing. Such editing may involve nothing more than a light edit, but might entail heavy condensing and extensive restructuring. In every instance, we take pains to preserve the author’s ideas.
- ▶ We avoid product mentions and all trade or copyright symbol inclusion.
- ▶ In the educational sections (as opposed to Product sections), there will be no references to the company’s name or any products by name. When the subject is the science and technology or applications of particular products, it should be presented “generically.” (The author’s blurb, as noted above, is an exception to this requirement.)
- ▶ If your article is accepted, you will be required to send us a signed Copy Release Form located at
